

KRISHNA

AI Engineer | Integrations, APIs & Agentic Systems

Mohali, Punjab • 8288838679 • n.krishnaworkspace@gmail.com • [linkedin](#) • [github](#)

SUMMARY

Applied AI engineer who builds and ships integrations: REST APIs, third-party platform connections, and automation workflows, with a year of production LLM work on top. Shipped 10+ deployed APIs and 25+ end-to-end automation pipelines at Welzin, alongside a 10-agent content generation system with Qdrant RAG and the Ragas eval harness that measured it. Currently at TeenyTechTrek on MCP server integrations, LLM data pipelines, and client delivery.

EXPERIENCE

AI Engineer | TeenyTechTrek

Mar 2026 – Present

Mohali • Hybrid

- Act as technical point of contact for two US- and India-based clients: gather requirements, author client-facing and technical documentation, translate between client and delivery team, and coordinate two full-stack developers (Node.js/React) through to delivery.
- Debug, deploy, and maintain a custom MCP server (Starlette/SSE) exposing tools and resources to Claude clients — structured integration between LLM clients and internal systems; author and maintain client configurations across environments.
- Build LLM-driven data generation pipelines: training datasets generated from LLM output grounded against factual content retrieved from a Qdrant vector DB, producing the dataset behind a Slack / MS Teams learning-delivery bot deployed to internal organisational teams.
- Extend internal Node.js applications; design and iterate system prompts for LLM content-generation agents in production.

AI & ML Intern | Welzin.ai

Sep 2025 – Mar 2026

Mohali • On-site

- Built and deployed 10+ Python REST APIs (FastAPI/Flask) handling data pipelines, file operations, and third-party platform integrations; containerised with Docker and deployed to Vercel and Railway.
- Engineered 25+ end-to-end n8n automation workflows, streamlining business processes across multiple operational pipelines.
- Architected a 10-agent content generation pipeline (research → planning → writing → optimisation → editorial QA) on the AGNO framework, with Qdrant RAG and live web-search grounding for factual accuracy.
- **Built an evaluation loop with Ragas** scoring generated output against retrieved source content — faithfulness improved from **4/10 at baseline to 7/10** by iterating on system prompts, tool-calling parameters, and pipeline structure.
- Instrumented the pipeline with LangFuse for token/cost tracing; integrated Qdrant vector search and semantic reranking into production RAG pipelines.

PROJECTS

OtakuMood — Mood-Driven Anime Recommender

Python • Streamlit • Groq (LLaMA 3.3 70B) • FAISS • Sentence-Transformers • AniList GraphQL [GitHub](#) • [Live demo](#)

- Built a semantic retrieval system over a live AniList GraphQL catalog using FAISS (IndexFlatIP with L2 normalisation for cosine similarity), over a full pipeline: GraphQL ingestion → parquet storage → FAISS index construction.
- Zero-shot mood classification into 8 emotional states via Groq/LLaMA 3.3 70B; cached LLM calls in Streamlit session state to eliminate redundant inference.
- Custom reranking formula: $0.6 \times \text{semantic similarity} + 0.3 \times \text{genre-mood alignment} + 0.1 \times \text{popularity}$.

TECHNICAL SKILLS

Backend & APIs — Python, FastAPI, Flask, REST API design, Node.js, Starlette (SSE), Streamlit

Integrations & Automation — n8n, third-party API integration, MCP (server & client), webhooks

Infrastructure — Docker, Vercel, Railway, Git/GitHub

Databases — PostgreSQL, Qdrant, FAISS

AI & LLM — AGNO, LangChain, Hugging Face Transformers, foundation model APIs (Anthropic, Gemini, Groq), RAG, system prompt design

Evaluation & Observability — Ragas, LangFuse (tracing, token/cost analysis)

Data — Pandas, NumPy

Tooling — Claude Code, Cursor, Postman, Jira, Notion

EDUCATION

Master of Computer Applications (Artificial Intelligence) — Indira Gandhi National Open University

2025 – 2027 (expected)

Bachelor of Computer Applications — GGDS College, Panjab University

2022 – 2025

CERTIFICATIONS

Model Context Protocol: Introduction & Advanced Topics — Anthropic, 2026 [verify](#)

Claude Code in Action — Anthropic, 2026 [verify](#)
